Web Development Task:

build a registration page for a conference website that includes:

- HTML form with fields for participant details (name, email, etc.).
- CSS styling with Bootstrap to ensure a visually appealing and responsive design.
- A servlet to handle form submissions, validate input, and display a confirmation using JSP.
- Basic SQL queries to store participant information in a database (use **MySQL**)

Deadline: Tuesday 29 October 2024

Instructions : submit a GitHub repo including the solution form
